COURSE INFO

How safe are your playgrounds?

The CPSC estimates that over 205,000 injuries occur on playgrounds each year, with approximately 15 resulting in death.

The Certified Playground Safety Inspectors Course is the most comprehensive training program on playground hazard identification and risk management methods anywhere.

Two playground safety experts present 15 hours of training, which includes an on-site playground visit. CPSI designed the pre-course study guide and training to prepare you for the Certified Playground Safety Inspector examination. The examination takes place the morning after course completion.

Program highlights include:

- Identify Hazards on the Playground
- Developing Risk Management Tools
- Importance of a Comprehensive Safety Program
- CPSC Guidance Review
- ASTM Standard Analysis
- Test Methods of Entrapment, Protrusions and Entanglement

CPSI does not recommend that you attempt the exam unless you have access to the materials three weeks prior to the course.
